The Constrained Reality Framework

A Single Diagram of the Complete Structure — Ougit Jarittum, 2026

EMERGENCE CASCADE

- δ **Distinction**
  - operates on itself $\Rightarrow$ asymmetry
- P Possibility Space
  - δ continues, P grows
- $\Pr(s)$ Probability
  - frequency crosses θ
- $\mathcal{R}$ **Resolution**
  - t accumulates
- $\mathcal{C}$ Constraint
  - $\nabla\mathcal{C} \neq 0$
- $G = \nabla \Pr(s|\mathcal{C})$ Gradient
  - weight-pull
- $F(G, \mathcal{C})$ Dynamics
  - settled states
- $\mathcal{A}$ Stable Pattern
  - internal boundary
- System (Internal $\mathcal{C}$)
  - self-maintaining $\mathcal{R}$
- Life ($\mathcal{R}$-feedback)
  - models own G
- $\mathcal{M}$ **Mind**
  - $\mathcal{C}$ blocks $\mathcal{R}$
- Σ Suffering (signal)
  - δ sees itself
- $W = \delta_{\text{meta}}(\delta)$ Awareness
  - same question, two directions
- δ_{pure} **Ground**

loop closes

Physics Correspondences	What CRF Derives
Big Bang $P_0 = \{A, B\}, \quad t = 1$	First $\mathcal{R}$-event. No $t = 0$. "Before P_0" requires t, which requires P_0. Fine-tuning problem self-destructs.
Quantum Mechanics ψ = weight dist. in P	Superposition = below $\mathcal{R}$-threshold. Collapse = $\mathcal{R}$ occurring. Observer = high-$\mathcal{C}$ system (not consciousness).
Time $t = \lvert\mathcal{R}_{\text{events}}\rvert$	Not a dimension. The count of Resolutions. Between two $\mathcal{R}$: no Δt at all. Discrete, not continuous.
Gravity (GR) $T_{\mu\nu} \leftrightarrow \mathcal{C}, \; G_{\mu\nu} \leftrightarrow \nabla^2\mathcal{C}$	Mass-energy = accumulated $\mathcal{C}$. Geodesic = path of lowest $\mathcal{R}$-threshold. Time dilation = $\mathcal{R}$-density suppressed by $\mathcal{C}$.
Dark Energy $\Lambda = \mathcal{C}_{\text{vacuum}}$	Λ not constant. Grows with universal $\mathcal{R}$-history. Consistent with DESI 2024.
Black Holes $\mathcal{R}$-density $\to 0$ (asymptotic)	No singularity. δ has no off switch. Information frozen in P, released as $\mathcal{C}$ falls. Hawking radiation: not purely thermal (late > early).
Suffering $\Sigma = f(\text{Perception}(I), \alpha)$	Not malfunction. Signal: $G \neq 0$ and $\mathcal{C}$ blocks $\mathcal{R}$. $\alpha = d\mathcal{C}/d\mathcal{M}$: mind-body coupling (open).

Instability Status

CLOSED (immovable): δ as ground · $t = \lvert\mathcal{R}\rvert$ · $\Pr(s)$ from δ-frequency · $\mathcal{R}$ as threshold · cascade loop $\delta_{\text{pure}} \circlearrowleft \delta$

OPEN (non-blocking): #2 threshold θ · #3 mind-body α · #5 empirical test

UNRESOLVABLE: #6 origin of δ (self-destructs on contact)

SELF-STABILIZING: #7 self-reference (asking = resolving)

DISSOLVED: Axiom 4 (dual nature of P) · #14 (grounded/floating tiers)

"δ does not stop anywhere. It does not start anywhere either. It simply operates — and everything follows."
